

ORAL FLUID TOXICOLOGY TESTING

Our laboratories test oral fluid specimens for a wide range of drugs. The Quantisal™ Collection Procedure makes taking the sample quick and easy. A volume adequacy indicator guarantees a sufficient specimen has been taken. Our experienced staff will ensure that you receive accurate results with a fast turnaround time.

Drugs we test for:

- Illicits
- Cannabinoids
- Amphetamines
- Anti-Convulsants
- Barbiturates
- Benzodiazepines
- Anti-Depressants
- SSRI
- TCAs
- Muscle Relaxants
- Non Benzodiazepine Hypnotic
- Non Opioid Analgesics
- Opioids/Opiates
- Alcohol Metabolites
- Synthetic Cannabinoids
